Su:5

: About

Su:5 promotes protective products for health and wellness from a holistic approach.

The name Su:5 pronounced simply, / Soo /, is inspired by the sound when one smoothly exhales breath deeply from his/her lungs - the most common meditative technique to clear the mind and relax the Body. The number "5" refers to the five human senses and five components of the products.

: Mask

5 layered Tri-panel structure Mask Su:5

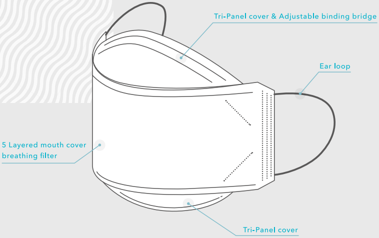
NATURAL BREATHABILITY

A Redefinition of Health & Etiquette

“Su:5” is originally developed five layered, tri-panel mask that has great functionality and style. The five layered filter strongly prevents transmission of the virus, and the tri-panel has its unique structure which adheres to the skin and helps the mouth less stuffy and comfortably breath in the mask.

Part 1

Tri-panel structure



Tri-Panel structure

Breath nice and easy

The tri-panel structure makes a room in front of the mouth with high adhesive cover. Wearing the mask enables both easy speaking & breathing, being both comfortable and non-intrusive to daily life. It is so dynamically loose-fitting over the mouth that lipstick stains are not even a concern.

Tri-Panel high Adhesion cover

Prevent viral invasion

The most remarkable point of this mask is tri-panel high adhesion cover.
It makes some room in front the mouth adhering to the skin and prevents particles.

Adjustable binding bridge

Adjustable comfort-fit nose panel

For ensured protection over the bridge of the nose and preventing spectacle lenses misting up on wearing a mask.

Ear loop

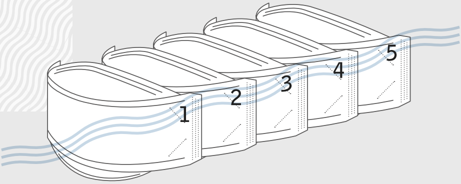
Comfortable ear loop

A round cord with high elasticity eliminates pressure to ears all day long.

Part 2

The

Five Layered Filter



5 Layered Filter blocks 99% of Ultrafine Air-Particulate [under 0.1 micron]

The size of most virus is about 0.1 micron, which is extremely impalpable. To prevent the virus invasions, each filter has different effect and characteristic, and well structured in the most effective order.

The second and forth filter are used melt- blown filter. This kind of filter has been *demonstrated by FDA that can block the 0.1 micron ultra fine particles more than 99%.

Not only the virus can be prevented, but also pollen or PM2.5 can be done effectively.

*Collection efficiency demonstrated at Nelson laboratories which is inspection agency designated by US FDA(Food and drug Administration)

COLLECTION INSPECTION	OBJECT OF PARTICLE	COLLECTION EFFICIENCY
BFE	BACTERIUM 3μm	99%
VFE	VIRUS POWER 0.1〜5μm AVERAGE 2.8μm	99%
PFE	MICROPARTICLE 0.1μm	99%

*Masks do not completely prevent infection.

1 **Polypropylene non-woven fabric**

Blocks particles in the air.

2 **Melt-blown filter fabric**

Blocks 0.1 micron of ultrafine micro-particles which is smaller than PM2.5.

3 **Bicomponent non-woven fabric**

Role of fixing the mask body.
Blocks particles in the air.

4 **Melt-blown filter fabric**

Blocks 0.1 micron of ultrafine micro-particles which is smaller than PM2.5.

5 **Bicomponent non-woven fabric**

Non-woven fabric with a soft feel.
